Marshfield Times is authority for the statement that coincident with the appearance of the mouse about 49 pairs of dainty French heels sought attitudinizing positions—some on chairs, some on desks and some on other vantage points, elevation from the floor being the crucial factor. The mouse came in just as one of the members was reading a paper on some deep subject of nation saving trend. In the scramble that followed the paper was lost.

POPE HAS RELAPSE; WORK IS PROHIBITED
Rome, Italy, April 8.—Pope Pius X, suffered a severe relapse in the course of last night. He was very feverish, his temperature rising to 100 degrees. Marchisava was with him for an hour.

After a thorough investigation, the physicians insisted that the pontiff should take complete rest and forbade him even to receive the usual daily report on Vatican affairs.

The only persons besides the physicians who were permitted to see the pope were cardinal Merry Del Val, the papal secretary of state, and the sisters and niece of the pontiff.

No official bulletin has been issued today concerning his condition, but a report is in circulation that the relapse he suffered last night was due to an affection of the kidneys.
